23 & 24 May 2012 – Protea Fürstenhof, Windhoek

CONSTRUCTION ESTIMATING

Practical "how-to" instructions and essential information on how to minimise errors which will help you to save valuable time and money on any construction project

This training course presents you with an opportunity to get up-to-date with the very latest principles, practices and techniques for accurately estimating construction project costs regardless of any changes in the cost of materials, equipment and labour. You will learn how to:

- Proactively manage the risks associated with accurate estimating
- Use proven tools to promote accuracy, efficiency and produce detailed estimates
- Allow for and build into your estimate realistic contingencies
- Organise cost data in a clear and logical manner
- Adjust your estimate in terms of variable factors that affect production rates
- Identify the most common errors but more importantly how to avoid making them

Professional Reference Manual plus additional Take-Home Data Pack (valued at over R1000) which is jam packed with current and up-to-date industry techniques, ideas and tools

Intensive 3-day Course in Project Management

<http://namibia.projectmanagement.co.za>

Windhoek
27-29 March 2012

Have you experienced three or more of these problems?

- We are over budget
- We are behind schedule
- They keep changing their mind
- We are doing more than we agreed to do
- Too many people are getting in the way
- They say it's my fault, but it was beyond my control
- People don't tell me what's going on
- Projects just never seem to be truly over

Here's what you can gain from the Intensive 3-day Course

You will be provided the essential project management fundamentals, with a written contribution of a team addressing a well defined goal.

We will be able to develop a framework for project analysis and planning.

Enough information to ensure you'll be equipped to plan a project step by step, with a detailed list of the requirements for monitoring, control and completion. You will learn the theory and apply it in practical application - including working on your own real subjects during the course.

You will be equipped to make informed decisions about the next steps in your own development, the following year or as possible further study towards PMB or MIP-CPM certification, or the Project Certification Programme in Project Management.

We will also be able to take a firm decision on what Project Management is your organisation.

Collaborative exercises are an integral part of the Program. Working in teams with a facilitator is used in the course.

Engineering Professions Association of Namibia

NOTICE OF NEW MEDICAL AID BENEFIT

We are extremely excited and take this opportunity to introduce to you a new medical aid group benefit which we have been working on some time.

Prosperity Health Namibia has established an umbrella group named: Namibia Professionals Association (NPA) under which the following Associations / Institutes can register their members and enjoy the group rate benefit:

Namibia Institute of Architects
GWATIN
Engineering Professions Association

Renaissance Health
Medical Aid Fund

In order to enjoy this new and exciting benefit of being a EPA member, please take note of the requirements set out by Prosperity Health for your application and registration and also note that you do require a letter from the EPA Administrator confirming your membership in which your category is registered. Also, please note that you have to apply for the group: NPA which will be controlled and administered by the EPA office in order to ensure correct rates and benefits.

Please request your brochure / contribution tables and application form from the EPA office. Kindly note that Prosperity Health has sent me the group contribution table - please let me know if you require an electronic copy.

Should you wish to make use of this added benefit of being a EPA member, kindly contact the Office Administrator, Tanja @ epa@africaonline.com.na. Please note we require your full names and identity numbers / dates of birth to complete the membership confirmation letter. For any further queries, you can also contact the group administrator, Duan Jansen at Prosperity Health at following details: tel: 061-299 9725 or duan.jansen@na.prosperityhealth.com and refer to NPA umbrella group for the EPA.

PLEASE NOTE: For any application to the group medical scheme you are requested to get a letter confirming your membership with the EPA or related office. The Private Practice is NOT entitled to sign / stamp any document on behalf of the group medical!

[The Structure of Quality]

Robor's ISO 9001 and ISO 14000 certified divisions supply the building and construction industry with steel that meets the required quality standards.

Products

- Cold Formed Steel Sections** - includes a full range of purlins, girts and other specialised profiles.
- Structural Hollow Sections and Mechanical Tube** - includes a full range of structural hollow sections and mechanical tubes.
- Long Steel Structural Sections** - includes universal beams, IPE sections, PEAA sections, channels, bars and angles.
- Concealment Pipes** - includes a full range of welded and seamless pipes.
- Sheet and Plate** - includes a wide range of Sheet and Plate with or without value added services.
- Roofing and Cladding** - includes Corrugated 762/610 and BR 886 profiles in both galvanized and colour.

Value Added Services:

- Scaffolding** - includes the supply, erection and dismantle of access scaffolding on a contract basis.
- Hybrid Structure Systems** - combine galvanized structural hollow sections with high strength, lightweight pre-galvanized cold formed steel sections that can result in a mass saving of up to 40%. Substantial cost savings and faster construction are additional benefits.
- Galvanizing** - Robor can galvanize structures of varying sizes to a high quality finish in accordance to various specifications.
- Other Value Added Services:**
 - shot blasting and primer painting
 - profiling
 - drilling
 - slitting
 - bending
 - cutting to size and more cutting
 - machining
 - shearing
 - bending
 - drilling
 - blasting
 - primer painting

Lean and profiling machines offer accurate, high quality cutting. Combined with a host of our other services performed by years of experience, we offer the most comprehensive and customised solutions from one supplier.

All products are manufactured according to SANS 557 Part 1 and 3, SANS 62, 719, 1192.
